 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Bisti Gallup San Juan County New Mexico
 (Field) (County or Subdivision) (State or Territory)
The elevation of the derrick floor above sea level is 6898 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

A Gamma Ray-Collar log was run and the intervals 5458'-5481' and 5495'-5509' were perforated with 1/2 jet shots per foot. These perforations were fraced with 30,000 gallons crude and 30,000 pounds of sand at 1900 psi and 48 barrels per minute. The well was potentialed on 1-15-58.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
