DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to plug and abandon this well by covering the Pictured Cliffs formation with cement to 1800 feet and then setting a surface plug with a marker. Oral approval to plug and abandon received June 30, 1960.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
