DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Will drill with rotary tools. The Gallup Sandstone Formation is the primary objective and is to be expected approximately 5500' below ground level. Will set 200' of 10 3/4" casing & cement with approximately 150 sacks cement. If commercial production is indicated by coring, D.S.T. and electrical log surveys, will set 5 1/2" or 7" casing to T.D. and perforate for production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
