17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

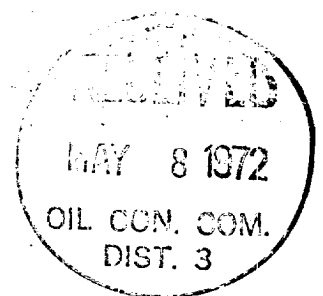

Intend to clean up face of perforations, 5926-34, with acid.

Set retrievable plug above Mayre zone and perforate Skelly and/or Upper Mancos formations. Fracture with gel water sand.

Remove retrievable plug and place well back in operation.

Work on this well, as well as four other wells we operate in Rio Arriba County, is expected to start about May 8, 1972.

Intent filed with both USGS in Durango and Farmington which is the way we did on the drilling of the Escrito Gallup Unit 19.

18. I hereby certify that the foregoing is true and correct
