13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Request long term shut-in. The Fruitland Coal in this well has not been fractured. Other coal wells in the area have produced significant amounts of water. Operator has attempted to pump this well to remove water. Only small amounts of water were recovered. It appears that the coal must be fractured. Area wells are being studied to determine the advisability of conducting such an operation in this well.
