14. API NO.

15. ELEVATIONS (SHOW DF, KDB, AND WD)

6714' GR

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The Dakota zone, 6356-64', was perforated, acidized, and fraced. The zone was making a small amount of gas and very little water, but did not justify a single completion as a Dakota well. The Elwood P. Dowd #2 is within one mile of the Whitewash Mancos Dakota pool.

Permission is requested to complete the well in this pool by leaving the Gallup Dakota zone 6365-64 open, selectively perforating and fracing the Gallup interval of the Mancos Shale, cleaning out and running tubing to produce both horizons as allowed by Whitewash Dakota Mancos Pool rules.
