BUREAU OF LAND MANAGEMENT
FARMINGTON RESOURCE AREA

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well is a non-commercial producer in the Gallup formation.
We propose to plug this well back by setting a cast iron bridge plug above present Gallup perfs at 3826-59' and place a 50' cement plug on top of the bridge plug. We will then perforate and test the Menefee formation shows encountered on the mud log 2679-2782' and 2106-33'.
