DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

In accordance with telephone conversation with USGS office at Farmington we propose to set bridge plug at 6200 feet and re-complete in Gallup formation. We propose to perforate the interval 6000-6096 feet and sandfrac the Gallup sandstone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
