(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

December 27, 1960

Well No. **1-28 Coral Unit** is located **1105** ft. from **S** line and **790** ft. from **W** line of **Sec. 28**
SW 1/4 Sec. 28 **25 N., R. 6 W.** **N.M.P.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Basin Dakota **Rio Arriba** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **6760** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

1. Drilling Procedure - Rotary tools surface to total depth, E. P. Campbell drilling contractor.
2. Surface Casing - 200' of 9 5/8" casing cemented to surface.
3. Production Casing - 7200' - 5 1/2" casing cemented to approximately 5900' to cover Gallup formation, and from 2700 to 2500' through DV tool to cover Pictured Cliffs formation.
4. Completion - Perforate and sandfrac Dakota formation. If Gallup production is also encountered will request Oil Conservation Commission approval for dual Gallup-Dakota completion on unorthodox Gallup location caused by topography.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
