May 23, 1963

Well No. **3** is located **1700** ft. from **[N]** line and **1650** ft. from **[E]** line of sec. **17**
NE/4 **17** **25-N** **7-W**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Ballard P.C. **Rio Arriba** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **6398.63** ft. **G.L.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was temporarily abandoned on May 1, 1963, due to insufficient reservoir pressure to produce against existing pipeline pressure; also due to "loading-up" condition of formation waters. Western Natural Gas Company intends to re-evaluate possibility of recompletion in the present P.C. zone at some later date.

RECEIVED

MAY 24 1963

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
