The elevation of the derrick floor above sea level is _____ ft. (To report later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above well was drilled to a total depth of 3870' and 4-1/2" casing set at that depth with 200 sacks of neat Incon cement containing 45 gal and 1-1/2 lbs. medium Taf Flu; per sack followed by 100 sacks neat Incon. After waiting on cement, tested casing to 3,000 psi for 30 minutes. Test o.k. Currently preparing to complete well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
