NW SW Sec. 27 T-26-N, R-10-W N.M.P.M. [W]
Wildcat Sec. and Sec. No.) Red Arriba County (Meridian) New Mexico
(Field) (County or Subdivision) (State or Territory)
To be furnished

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

The objective sand is the Pictured Cliffs expected at about 3500'. Proposed casing program 200' 9-5/8" cemented to surface
3500' 7" cemented with 150 sacks

Well will be drilled using rotary tools to top of Pictured Cliffs where casing will be set. Pictured Cliffs will be cleaned out using cable tools to a total depth of about 3550'. Well will be sand fraced using about 10,000 gals. oil and 5000# sand.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

HOW TO REPAIR

(The name of the individual and expected date of publication of the work should be provided.)

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1861. It is a formal address, and it is the first of its kind since the signing of the Constitution. The President, James Buchanan, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is discussing the issues that are facing the country at that time. He is also discussing the role of the President, and he is discussing the responsibilities of the Congress. The letter is a very important document, and it is a very interesting one to read. It gives us a glimpse into the mind of a President, and it gives us a glimpse into the state of the country at that time. It is a document that is worth reading, and it is a document that is worth studying.

! understand that this plan of work must receive approval from the Council of the League of Nations.

Compass

Address _____

Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair, viewing a screen displaying a target. The target is a small object (e.g., a ball) that is launched from a fixed position. The subject's hand is positioned at the launch point, and the target is launched at a fixed angle. The subject's hand is positioned at the launch point, and the target is launched at a fixed angle. The subject's hand is positioned at the launch point, and the target is launched at a fixed angle.
