The first part of the report is a general statement of the purpose of the study. The purpose of the study is to determine the effect of the new curriculum on the students' learning outcomes. The study was conducted in a secondary school in the city of ... The study was conducted in a secondary school in the city of ... The study was conducted in a secondary school in the city of ...

The second part of the report is a description of the research methodology. The research methodology used in this study is a quantitative approach. The data was collected through a survey of the students. The survey was conducted in the form of a questionnaire. The questionnaire was distributed to the students at the beginning of the study. The data was then analyzed using statistical methods.

The third part of the report is a presentation of the results of the study. The results of the study show that the new curriculum has a positive effect on the students' learning outcomes. The students who were taught using the new curriculum achieved higher scores than the students who were taught using the old curriculum. This result is significant at the 5% level.

The fourth part of the report is a conclusion and recommendation. The conclusion of the study is that the new curriculum is more effective than the old curriculum. The recommendation is that the new curriculum should be implemented in all secondary schools.
