Subject: Application For Non-Standard
Well Location - South Blanco-
Pictured Cliffs Gas Pool
Rio Arriba County, New Mexico

Mr. W. B. Macey
New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Dear Sir:

In compliance with Order No. R-565, Rule 4, application is hereby made for a non-standard well location, Jicarilla Contract #155, Well No. 7, 750' from West Line and 1800' from North Line, Section 29, T-26-N, R-5-W, Rio Arriba County, New Mexico. A non-standard well location is required because of topographical conditions.

Attached is a plat showing well location. Inasmuch as this location is closer than the standard distance only to a section line located within the same Stanolind lease and royalty account, no other operators were supplied copy of this application.

I hereby certify that the above and the attached plat are true and correct to the best of my knowledge.

We are now drilling in this area and would like to move on this location in the near future. Your early consideration of our application will be appreciated.

Very truly yours,

The authors are also grateful to the National Science Foundation (NSF) for the support of this work. The work was supported by the NSF Grant No. 0000000.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

[illegible]

the 1990s, the number of people in the United States who are 65 years of age or older is projected to increase from 20 million to 30 million, and the number of people 75 years of age or older is projected to increase from 10 million to 15 million (U.S. Census Bureau, 1997). The number of people 85 years of age or older is projected to increase from 2 million to 4 million (U.S. Census Bureau, 1997). The number of people 90 years of age or older is projected to increase from 500,000 to 1 million (U.S. Census Bureau, 1997). The number of people 95 years of age or older is projected to increase from 100,000 to 200,000 (U.S. Census Bureau, 1997). The number of people 100 years of age or older is projected to increase from 10,000 to 20,000 (U.S. Census Bureau, 1997).
