13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The trimingle of these three zones in April 1998 resulted in lost production, and was therefore deemed unsuccessful. In July 1998, the wellbore was reconfigured as a dual completion, with Tapacito PC in combination with downhole commingled Blanco MV and Wildhorse DK. A subsequent sundry notice was never filed to report well returned to dual completion configuration. Please accept this sundry notice with attached daily summary to cover that change.
