LOG OF OIL OR GAS WELL

LOCATE WELL CORRECTLY

The information given herein is a complete and correct record of the work and all work done thereon as far as can be determined from all available records.

Location _____
Date _____
Time of day _____
Name of _____
Section _____
Division _____
Person or Firm _____
County _____
State _____
Address _____

9-28-77 removed broken head and found 50 inches cement in the 9 5/8" casing from 90' circulated to surface. A short joint of 4" pipe was placed on top with well name location for a permanent marker.

9-25-54 Dia Log Jet cutting in 11.5 and about 1775'. Pulled a total of 46 joints 5 1/2 casing (1775').

9-24-54 Attempted to recomplate in Kirtland formation. Set late wells bridging plug @ 2620'. Dumped 400# of Hydramite on top of plug. Top of hydramite plug @ 2583'. Perforated w/ late wells 2 sets of 2 bullets from 2130' to 2105', slight blow of air for 10 minutes and died. Water level found in casing @ 150', swabbed for one hour. Approximately 200' of water was (swabbed) each run. Water level remained at 150'. Water was fresh, and producing approx. 6,000 gallons per hour. Second late wells bridging plug was set at 1875' with 400# hydramite dumped on top of plug @ 1838'.

Send-oil fracture
Placed 269' - 274'. T.D. with 10,000 gallons oil
and 5,200# sand. BOP 1400', maximum pressure 1350', injection rate 294 gallons
per minute. Natural gas test, 100 MCF.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked", or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
