Magnolia Petroleum Company
Box 727
Kermit, Texas

Attention: Mr. C. A. Miller

Gentlemen:

Refer to Administrative Order DC-346 dated September 23, 1956.

Will you please change the first paragraph headed "IT IS THEREFORE ORDERED" to read as follows:

That the applicant, herein, Magnolia Petroleum Company be and it hereby is authorized to dually complete its Jicarilla "D" Well No. 1, located in the SE/4 SW/4 of Section 24, Township 26 North, Range 3 West, NMPM, Rio Arriba County in such manner as to permit production of gas from the Pictured Cliffs formation of an undesignated Pictured Cliffs Pool by proper perforation of the casing through one string of tubing and the production of gas from the Mesaverde Formation of an undesignated Mesaverde Pool by proper perforation of a liner through another string of tubing and the installation of a suitable packer and with the installation of adequate surface equipment to maintain complete separation of the two zones of production.

Very truly yours,

A. L. PORTER, JR.
Secretary-Director

[illegible]

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the medium containing 100 mg/l of tetracycline. The cells were harvested at the stationary phase and adjusted to the concentration of 1×10^8 cells/ml. The cells were then mixed with the plant protoplasts and cocultured for 48 h. The cells were then separated from the protoplasts and transformed with the plasmid. The transformation efficiency was determined by the number of transformants per protoplast. The results are shown as the mean \pm SD of three independent experiments.
