11-26-5

Gentlemen:

According to records in our files, the deliverability for the EPNG Jicarilla No. 8-J, Section 18, 26N, 5W in the South Blanco Pictured Cliffs Pool should be 556 MCF/D rather than 558 MCF/D as shown on the Proration Schedule. This well was tested on December 24, 1957 and January 9, 1958 on an initial deliverability test (see Form 122-A).

At your earliest convenience, will you please correct your records to reflect this fact.

Yours very truly,

D. H. Rainey
Proration Department
