

June 28, 1954

Mr. Ed W. Cannedy
616 East Central
Albuquerque, New Mexico

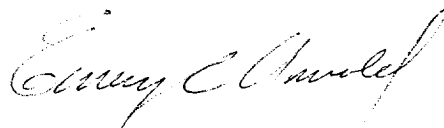

Dear Sir:

We are returning Gas Well Plats which you have submitted on your #1 Sanchez well in the SE $\frac{1}{4}$ Sec. 2-26N-6W.

The New Mexico Oil Conservation Commission rules specify that the 160 acres which is dedicated to any Pictured Cliffs well must be wholly within one governmental quarter-section. We notice that you have three forties in the SE $\frac{1}{4}$ and one forty in the NE $\frac{1}{4}$. If the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$ is under separate ownership then it will be necessary that you communitise your 120 acres with this 40 acres for purposes of production.

We will be unable to approve forms C-104, Request for Allowable, and C-110, Authorization to Transport Oil & Gas, until we have received evidence from you that your communitisation is in process or until we have received a corrected Gas Well Plat showing the corrected acreage as dedicated to this well.

Yours very truly,

Emory C. Arnold
Oil & Gas Inspector
District #3

Mr. W. C. Sullivan
Federal Reserve Bank
Washington, D.C.

Dear Sir:

We are reviewing the data which you have submitted on your 100 series and in the 100 series.

The New Mexico Oil Conservation Commission also reports that the 100 series which is referred to as "Production" must be wholly within the governmental jurisdiction. It is noted that you have three series in the 100 series. If the 100 series is to be one thing in the 100 series, it will be necessary that your committee give the 100 series which is referred to as "Production".

It will be unable to approve form 0-100, because the 100 series, and 0-100, Authority to Transfer 100 series, will be have received evidence from you that your commission is in process or until we have received a corrected 100 series. This showing the corrected series as indicated in this well.

Yours very truly,

Very truly yours,

Mr. W. C. Sullivan
