DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Shut in 11-6-58 for indefinite period because gas production at present high line pressure is not sufficient to pay operating expenses.

Well will be left in condition for future operations should that become desirable.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
