DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Present production from this well is 6 barrels of oil and 220 barrels water per day approximately. It is now proposed to use it for the injection of water, injection to start September 8, 1961 at approximately 700 barrels per day.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
