D	ETAILS (	OF WORK
D names of and expected depths to objective sands:	ETAILS	
names of and expected depths to objective sands; s	ETAILS (show sizes, we and all other is	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, cen mportant proposed work)
names of and expected depths to objective sands; sing points, a	ETAILS (show sizes, we and all other is	OF WORK
names of and expected depths to objective sands; a ing points, a	ETAILS (show sizes, we and all other is	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, cen mportant proposed work)
names of and expected depths to objective sands; a ing points, a	ETAILS (show sizes, we and all other is	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, cen mportant proposed work)
names of and expected depths to objective sands; a ing points, a	ETAILS (show sizes, we and all other in the ground the	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, cen mportant proposed work)
names of and expected depths to objective sands; a ing points, a	ETAILS (show sizes, we and all other in the ground the	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commportant proposed work)  11 be set at 2 hoo? and cammad from
names of and expected depths to objective sands; a ing points, a surface string of \$5/5" or the chee to the surface of the chee to the surface of the expectation to depth of 1900 for the cheese cored with retary to	ETAILS ( show sizes, we not all other in  seting with the ground  the ground  the Picture  The F	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commortant proposed work)  ill be set at 2 100° and camuated from the set at 2 10° and camuated from the
names of and expected depths to objective sands; a ing points, a surface string of \$5/5" or the chee to the surface of the chee to the surface of the expectation to depth of 1900 final cored with retary to	ETAILS (show sizes, we and all other in the ground the	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commortant proposed work)  ill be set at 2 100° and camuated from the set at 2 10° and camuated from the
names of and expected depths to objective sands; a ing points, a surface string of \$5/5" or the chao to the surface of the chao to the surface of the expectation to depth of 1900 for the chaosis cored with retary to	ETAILS ( show sizes, we not all other in  seting with the ground  the ground  the Picture  The F	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commortant proposed work)  ill be set at 2 100° and camuated from the set at 2 10° and camuated from the
names of and expected depths to objective sands; a ing points, a A surplace string of \$5/0° or the above to the surplace of the above to the surplace of the objective cand will be the approximate depth of 3900 ft. diamond cored with retary to the producing string of \$2/2 (liff cand and be calculated with	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commortant proposed work)  ill be set at 2 100° and camuated from the set at 2 10° and camuated from the
names of and expected depths to objective sands; a ing points, a surface string of \$5/5" or the chao to the surface of the chao to the surface of the expectation to depth of 1900 for the chaosis cored with retary to	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commortant proposed work)  ill be set at 2 100° and camuated from the set at 2 10° and camuated from the
names of and expected depths to objective sands; a ing points, a A surface string of \$5/0° or the chee to the surface of the chee to the surface of the objective cand will be the approximate depth of 3900 ft. diamend cored with retary too The producing string of \$1/2 Cliff cand and be concerned with surfaces to the canonical with surfaces will be preferred.	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commontant proposed work)  ill be set at 2 100° and cammated from the  mod Gliff to be empountered at an  Metural Gliff gas cand will be  g will be set through the Pictured and campaction.
names of and expected depths to objective sands; a ing points, a A swafface strong of \$5/0° or the chee to the surface of the chee to the surface of the objective cand will be the approximate depth of 3000 ft. Classific cored with retary too The producing string of \$1/20 Cliff cand and be concerned with section with	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commortant proposed work)  ill be set at 2 100° and camuated from the set at 2 10° and camuated from the
names of and expected depths to objective sands; a ing points, a A swelfage string of \$5/0° or the chee to the surfage of the chee to the surfage of the chee to the surfage of the approximate depth of 1900 file diament cored with sutary too the producing string of \$1/2 Cliff sand and be canceled with successful the caseing will be purferance with cheeses the caseing will be purferance with concernation of the caseing will be purferance.	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commontant proposed work)  ill be set at 2 100° and cammated from the  mod Gliff to be empountered at an  Metural Gliff gas cand will be  g will be set through the Pictured and campaction.
names of and expected depths to objective sands; a ing points, a A surface string of \$ 5/5" or the cheet to the surface of the cheet to the surface of the cheet to the surface of the cheet to depth of 1900 for diament cored with rutary to the producing string of \$ 1/2 Cliff sand and be cancated with cheet and the cancated with content to the cancated with the can	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commontant proposed work)  ill be set at 2 100° and cammated from the  mod Gliff to be empountered at an  Metural Gliff gas cand will be  g will be set through the Pictured and campaction.
names of and expected depths to objective sands; a ing points, a A swelfage string of \$5/0° or the chee to the surfage of the chee to the surfage of the chee to the surfage of the approximate depth of 1900 file diament cored with sutary too the producing string of \$1/2 Cliff sand and be canceled with successful the caseing will be purferance with cheeses the caseing will be purferance with concernation of the caseing will be purferance.	ETAILS of the state of the stat	OF WORK  ights, and lengths of proposed casings; indicate mudding jobs, commontant proposed work)  ill be set at 2 100° and cammated from the  mod Gliff to be empountered at an  Metural Gliff gas cand will be  g will be set through the Pictured and campaction.

Henolulu Oil Co. Company Well No. & 3 Jicarilla Apache Lease T 26 N R. 4 W N.A.P. Sec. 1450 feet from south line; 1450 feet

7134 GL. Elevation:
