RE: McIntrye #1, F-11-26N-04W, 30-039-06592

Dear Kay:

The 1994 Packer Leakage Test on the referenced well was inconclusive. Please reschedule and retest the well enough to prove zone separation. Shut both zones in for a minimum of three days. Flow the higher pressured zone to the atmosphere until the pressure decreases enough to determine if there is zone separation. Notify this office at least 24 hours before the test so we may provide a witness. The test should be conducted before May 1, 1995.

Sincerely,

Johnny Robinson
Deputy Oil & Gas Inspector

JR/sh
