Re: Application to
drill Eisner #1
Rueckhaus et al,
7-26N-2W, Rio
Arriba County

Dear Mr. Arnold:

By this letter we are requesting tentative approval for the dual completion of the above described well in the Pictured Cliffs and Mesaverde formations as a gas-gas dual. It is our intention to set 10 3/4" casing at 300', 7 5/8" casing at approximately 4000' and a 5 1/2" liner from approximately 3900' to 6200' through the Mesaverde formation. Productive zones in the Pictured Cliffs and Mesaverde zones will then be perforated and fraced. 2 3/8" J55 tubing will then be run to approximately 6000' with a Baker Model D production packer set at approximately 5450'. 2 3/8" tubing will then be run in the casing-tubing annulus to the Pictured Cliffs zone.

Sincerely yours,

Ben Donegan

Re: Application for Tentative Approval
for dual completion of Eisner #1
Ruekhaus, Section 7-26N-2W

Dear Sir:

By this letter we are granting tentative approval for the dual completion of the above well in the Pictured Cliffs and Mesaverde formations, as a gas-gas dual. It is understood that the well will be equipped as set out in your application of March 25, 1957. Our approval is also subject to the Oil Conservation Commission's findings in Case #1227 which was heard before Examiner Warren Mankin in Farmington, March 21, 1957.

Upon final completion application for administrative approval should be made to Mr. A. L. Porter, Director of the Oil Conservation Commission Box 871, Santa Fe, New Mexico. This application should include a schematic diagram of the equipment used and intervals perforated, along with waivers from your offset operators and packer-setting affidavit.

Yours very truly

Emery C. Arnold
Supervisor, District #3
