The elevation of the derrick floor above sea level is 6437 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is to report the following potential test:

Potential test October 8, 1963. Flowed 1770 MCF per day through 3/4" choke after 3 hours.  
Absolute open flow potential 1941 MCF per day. Shut in casing pressure after 7 days 2293 psig.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
