The elevation of the derrick floor above sea level is _____ ft. (to be furnished later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill with Rotary Tools to approximately 3000' to test the Pictured Cliffs formation.

Casing Program:

500' of 8-5/8" OD casing with 350 sacks of regular cement. To be circulated.
Approximately 3000' of 5 1/2" OD casing with 250 sacks of regular cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
