Gentlemen:

We propose to drill the subject well to a projected depth of 6200'. It is further proposed to dually complete this well in the Pictured Cliffs and Mesa Verde zones.

We further propose to set approximately 350' of 10-3/4" casing, 4100' of 7-5/8" intermediate string, and set 2200' of 5-1/2" liner on bottom. We will perforate in the Pictured Cliffs zone and the Mesa Verde zone and attempt a dual gas completion. Dual tubing strings will be run.

The subject well is located 990' FSL & 990' FWL of Section 1, T-26N, R-3W, Rio Arriba County, New Mexico.

Yours very truly,

G. S. Young, Jr.
District Superintendent
of Production
