Dear Sir:

We propose to drill the subject well to a projected depth of 6300'. It is further proposed to dually complete this well in the Pictured Cliffs and Mesa Verde Zones.

We further propose to set 10-3/4" surface casing, 7-5/8" intermediate string at approximately 4100', and set a 5-1/2" liner on bottom. We will perforate in the Pictured Cliffs Zone and in the Mesa Verde Zone, and attempt a dual gas completion. Dual tubing strings will be run.

The subject well is located 990' FNL and 990' FEL of Section 2, T-26N, R-3W, Rio Arriba County, New Mexico.

Very truly yours,

W. C. Dougherty
District Superintendent
