1000 RIO BRAZOS ROAD
AZTEC, NEW MEXICO

July 6, 1961

Compass Exploration, Inc.
101 University Boulevard
Denver 6, Colorado

Attn: Mr. P. J. Farrelly
Chief Geologist

Dear Sir:

We have received copies of Federal Notice of Intention to Drill for your #1 Lindrith well located in the SW $\frac{1}{4}$ Section 3-26N-7W.

This well is located within the boundaries of the South Blanco Pictured Cliffs Pool. You have not indicated on your Notice of Intention to Drill that it is your intention to cover the Pictured Cliffs-Fruitland formations with cement. We are, therefore, approving your Notice with the stipulation that this be done, in the event the production casing is cemented in this well.

Yours very truly

Emery C. Arnold
Supervisor, District #3

OIL CONSERVATION COMMISSION
1000 RIVINGTON ROAD
ATLANTA, GEORGIA

Dear Sirs:

Enclosed for you are two copies of
the report of the Commission on
the Conservation of Oil.

Very truly yours,
Chairman

Sincerely,
Secretary

The Commission on the Conservation of Oil was organized in 1942 to study the oil resources of the United States and to recommend ways in which these resources could be conserved. The Commission has since that time held numerous public hearings and has received many suggestions from interested parties. The Commission's report is the result of its study of these suggestions and of its own research. It is hoped that this report will be of some help to you in your work.

Very truly yours,

Chairman
Secretary

Sincerely,
Secretary
