P.O. Box 965
Farmington, New Mexico

Gentlemen:

Attached please find notice of intention to drill Intex-South Penn Hijo #1-5 well. You will note that we contemplate the cementing of the long or production string in this well in two stages. I believe this fulfills all the requirements of New Mexico Rule #107 in addition to reducing the price of wells drilled at Puerto Chiquita to a point which may make it economical to continue to drill and produce the rather small wells obtained on the last three completions at Puerto Chiquita.

Very truly yours

INTEX OIL COMPANY
