DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate bedding jobs, cementing points, and all other important proposed work)

A corrected notice of intention to drill this well was forwarded May 25, 1956, which listed a three string casing program and a proposal to drill with gas from 2 3600'. Because of a casing shortage it is now proposed to drill to total depth with mud and to set two strings of casing.

Present Proposed Program:

CASING PROGRAM

Size	Weight	Depth
8-5/8"	21.5	950'
5-1/2"	14.5 & 15.5	6200'

CEMENTING PROGRAM

Circulate to surface  
Circulate to 8-5/8" casing

GOING PROGRAM

Pictured Cliffs  
Cliff House  
Point Lookout

Proposed total depth - 6200' to test Mesa Verde

Low water loss mud with diesel additive

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
