PACKER-SETTING AFFIDAVIT  
(Dual Completions)

STATE OF NEW MEXICO )  
 ) ss  
County of BERNALILLO )

W. R. Johnston, being first duly sworn according to law, upon  
his oath deposes and says:

That he is of lawful age and has full knowledge of the facts herein below  
set out.

That he is employed by Johnston and Shear in the capacity of  
Partner and as such is its authorized agent.

That on December 5, 19 58, he personally supervised the setting of  
a Baker Model HJ in Johnston and Shear's  
(Make & Type of Packer) (Operator)

26-3 Well No. 1-3, located in Unit  
(Lease)

Letter H, Section 3, Township 26 N, Range 3 W, NMPM,  
Rio Arriba County, New Mexico.

That said packer was set at a subsurface depth of 5407 REB feet,  
said depth measurement having been furnished by steel tape.

That the purpose of setting this packer was to effect a seal in the annular  
space between the two strings of pipe where the packer was set so as to prevent the  
commingling, within the well-bore, of fluids produced from a stratum below the packer  
with fluids produced from a stratum above the packer. That this packer was properly  
set and that it did, when set, effectively and absolutely seal off the annular space  
between the two strings of pipe where it was set in such manner as that it prevented  
any movement of fluids across the packer.
