

## DEVELOPMENT PLAN FOR SURFACE USE

Tribal "C" 2A-6

Consolidated Oil & Gas, Inc. - Operator

Jicarilla Apache Tribal Contract #97  
NW SW Sec. 6-T26N-R3W NMPM  
Rio Arriba County, New Mexico

### 1. Existing Roads

See enclosed topographic map (Exhibit 1) which shows existing improved and unimproved roads. The town of Lindrith is located approximately 15 miles on south on Highway 537 and 13 miles east on a County road.

### 2. Planned Access Roads

See enclosed topographic map. Will use existing roads to the edge of the well site.

### 3. Location of Existing Wells

See enclosed topographic map

### 4. Location of Existing and/or Proposed Facilities

See enclosed topographic map showing location of wells and facilities operated by Consolidated Oil & Gas, Inc. If production is encountered, the tank battery and other required producing equipment will be located per attached completion plat. (Exhibit 2)

### 5. Location and Type of Water Supply

Water for drilling will be trucked approximately six miles from water hole in Tapacito Creek.

### 6. Source of Construction Materials

No additional construction material will be required.

### 7. Methods of Handling Waste Disposal

All waste material will be contained by earthen and steel pits. Earthen pits will be subsequently backfilled and buried. A portable chemical toilet will be furnished for drilling personnel.

8. Ancillary Facilities

No separate drill campsites are proposed

9. Wellsite Layout

The drilling site location will be graded and will approximate 200 x 250 with natural drainage to the west. Care will be taken while grading to control erosion. A 4' cut will be required on the east side of the wellsite. See attached drillsite layout. (Exhibit 3)

10. Plans for Restoration of Surface

- A. Following drilling and completion operations, all equipment and material not needed for operations will be removed. Pits containing fluid will be fenced until filled with any additional pits filled and the location cleaned of all trash and junk.
- B. After abandonment, any special rehabilitation and/or revegetation requirements (reseed with seed mixture No. 2) will be complied with and accomplished as expeditiously as possible. All pits should be filled and leveled within 90 days after abandonment.

11. Other Information

The location is in a valley between two sandrock bluffs with a dry wash running just west of the location. The sandy clay soil has sagebrush and gramma vegetation with the land used for grazing. The closest structure is a gas plant approximately one-half mile to the south. The surface is owned by the Indians.

12. Operator's Representative

Consolidated Oil & Gas, Inc.  
Floyd E. Ellison, Jr.  
Area Production Manager  
1860 Lincoln Street  
Denver, Colorado 80295  
Phone (303) 255-1751

13. Certification

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and that the work associated with the operations proposed herein will be performed by Consolidated Oil & Gas, Inc. and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved.
