Unorthodox Well Location -
Jicarilla Apache 102 Well No. 23
NW/4 of Section 3-T26N-R4W
Tapacito Pictured Cliffs Pool
Rio Arriba County, New Mexico

Amoco requests New Mexico Oil Conservation Commission approval to drill its Jicarilla Apache 102 Well No. 23, a Tapacito Pictured Cliffs well, as a non-standard well location in Unit "D" (the NW/4) of Section 3-T26N-R4W at a distance 1120' FNL and 470' FWL of Section 3.

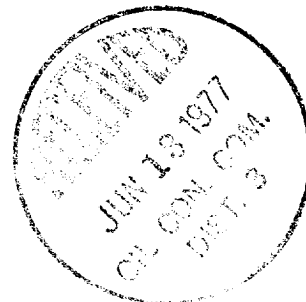

Topography is the reason for this unorthodox location. Enclosed Form C-102 shows with a sketch the location of the unorthodox well below a steep cliff. The enclosed portion of a USGS topo sheet further shows the rugged terrain in this area and the location of a new road to the unorthodox staked well site. This unorthodox location does not comply with Rule 2 of the Tapacito Pool rules which require a 790' setback.

A third attachment shows that Amoco operates all 160 acre gas spacing units and the wells thereon that offset the NW/4 of Section 3 upon which the unorthodox well would be located, except for the San Juan 27-4 Unit, to the north, operated by El Paso. By copy of this letter, we request that El Paso sign in the space provided that they have no objection to this unorthodox well location in the NW/4 of Section 3, sending one signed copy to you, returning one copy to me, and retaining the third copy for El Paso's needs.

Yours truly,

R. B. Giles
