Archaeological Clearance Survey of  
Five Proposed Well Locations, & their  
Accesses Conducted for Rolin Oil Co., Inc.

On May 18, 1977 Billy J. Naylor of New Mexico State University's Cultural Resource Management Program, San Juan College, conducted an archaeological clearance survey of five proposed well locations and their access routes at the request of Mr. F. P. Crum, Jr. Also present during the investigations were Mr. Crum, Mr. Bob Moore, BLM and Mr. Don Englishman, U.S.G.S.

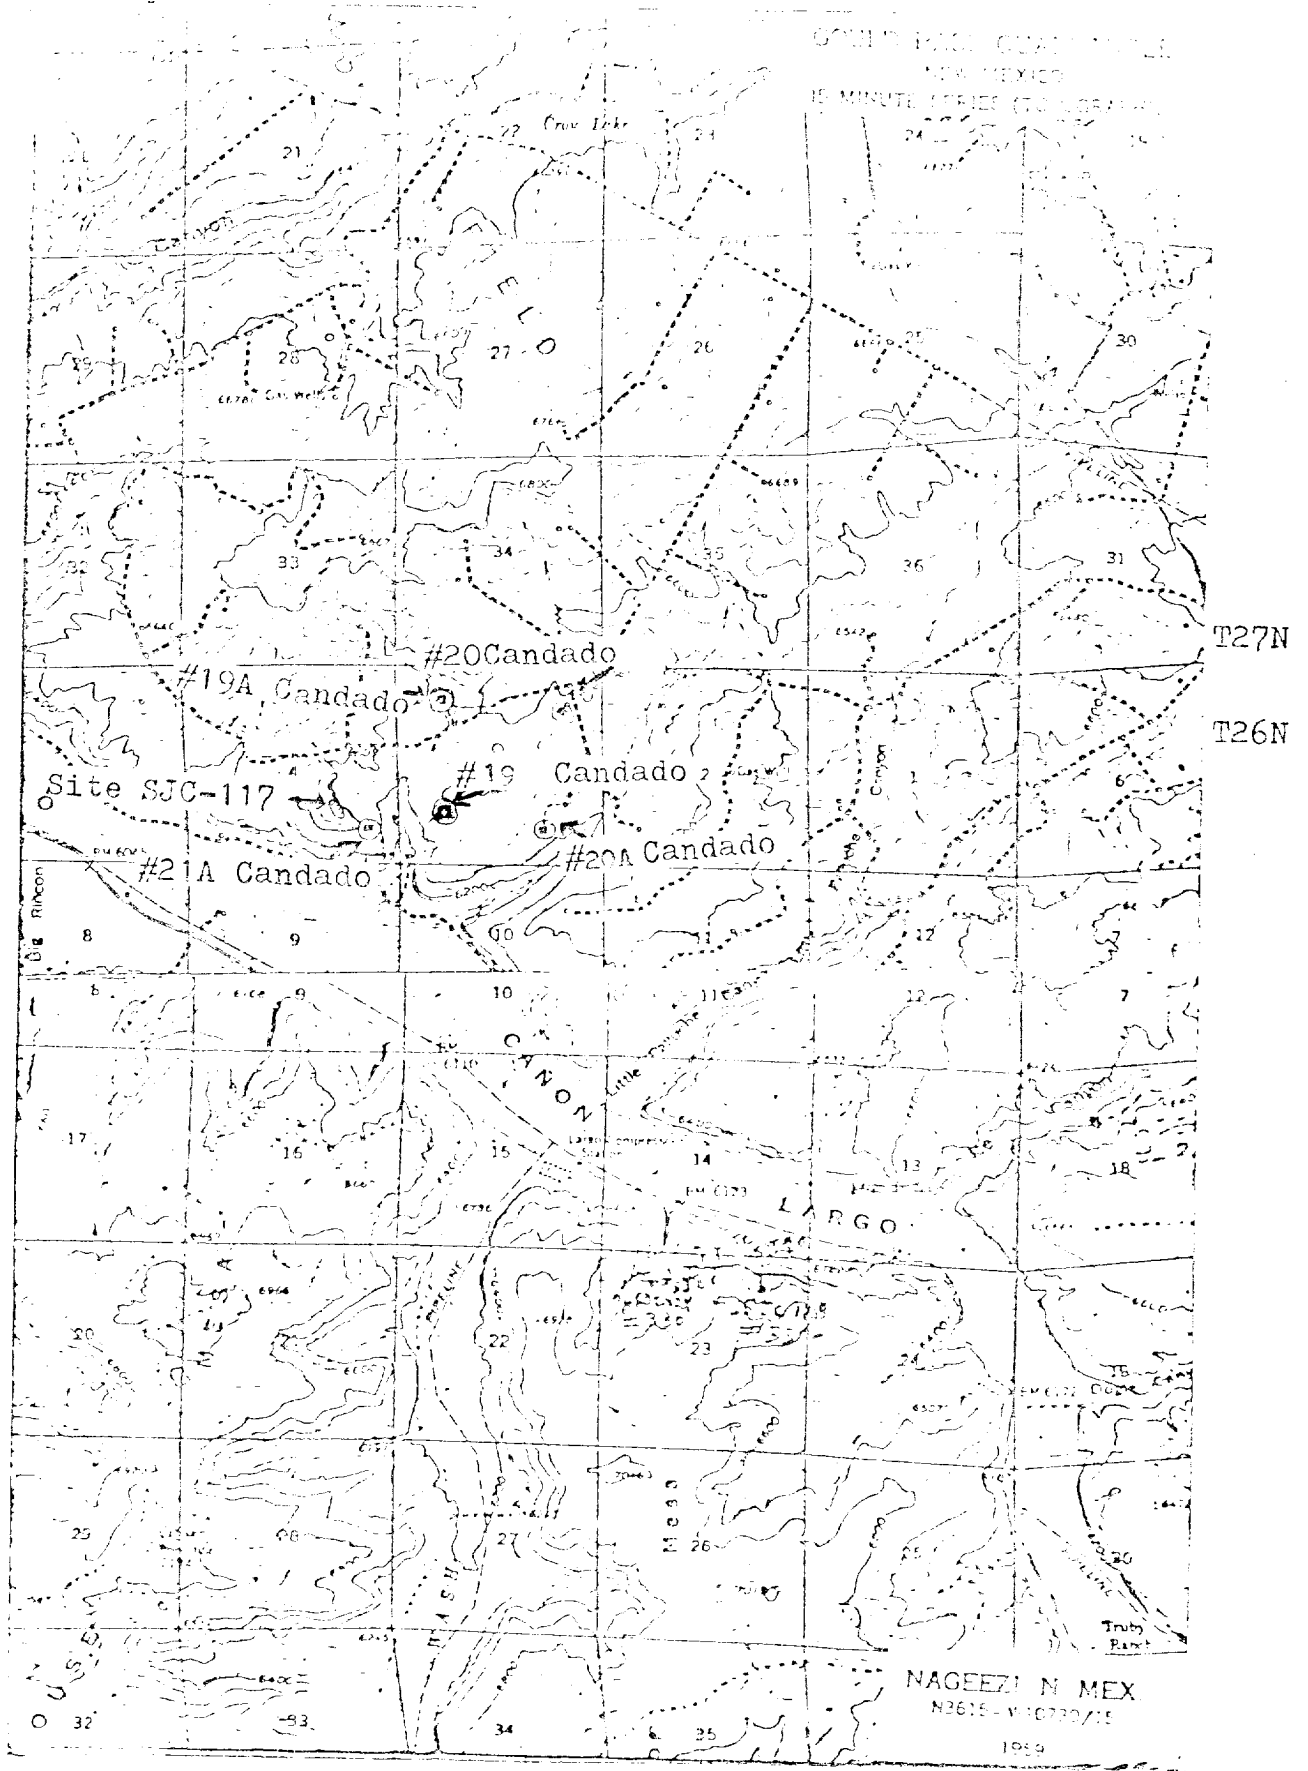

All five of the locations are on Bureau of Land Management lands and the survey was conducted under Federal Antiquities Permit 75-NM-013.

✓ #19 CANDADO

Proposed well #19 Candado has a 600 foot access and is 1430 feet from the south line and 1035 feet from the west line of Section 3, Township 26 North, Range 7 West, Rio Arriba County, New Mexico, N.M.P.M. (Figure 1)

The location is on a ridge in rolling broken terrain with a south westerly slope. The soil is clayey sand and the vegetation consists of juniper, sagebrush, and blue grama.

No cultural resources were found and clearance is recommended.
