

NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

I, Gary Brink, being of lawful age and having full  
*Name of party making report*  
knowledge of the facts hereinbelow set out do state:

That I am employed by EPNG in the capacity of  
Petroleum Engineer, that on August 10,, 19 78

I personally supervised the setting of a Baker Model G Locator Seal Assembly in a polished bore  
*Make & type of packer* receptacle

in Northwest Production Corporation, Jicarilla 152 W,  
*Operator of well* *Lease name*

Well no. 2A located in the So. Blanco PC & Blanco MV field,

Rio Arriba county, state of New Mexico, at a subsurface depth of

3369' feet, said depth measurement having been furnished me by

tubing;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
