14. API NO.

15. ELEVATIONS (SHOW DF, KDB, AND WD)
6781 G.L.

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We originally filed to complete this well only in the Dakota zone. We now propose to complete it as a Dakota - Mesaverde dual. The papers have been filed with the New Mexico Oil Conservation Division and all offset operators have been notified. The Dakota will be perforated from 7676 ft. to 7822 ft. and sand - water fractured with 52,500 lb. of 20-40 sand and 52,500 gallons of 1% KCl water. The Mesaverde zone will be perforated from 5083 ft. to 5839 ft. and sand - water fractured with 72,000 lb. of 20-40 sand and 72,000 gallons of 1% KCl water.
