17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

We wish to complete this well as a Blanco Mesaverde and a B S Mesa Gallup well. The B S Mesa Gallup will be perforated and completed by acidizing with HCL acid. This zone will be tested before a bridge plug is set above the Gallup zone. After the test is completed we will perforate and fracture the Mesaverde zone, and complete the well as originally scheduled. A new plat is attached showing the dedicated acreage for this changed formation. We also wish to change this well number from Jicarilla "G" No. 9-M to Jicarilla "G" No. 9-A to comply with State of New Mexico requirements.
