(NOTE: Report results of multiple completion or zone change on Form 9-330.)

(other) Supplementary Well History X

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

1. Set retrievable bridge plug at 3560 ft. R.K.B.
2. Pressure-tested casing to 3000 P.S.I.
3. Perforated Pictured Cliffs zone from 3494 ft. to 3507 ft. R.K.B. with 8 holes.
4. Circulated hole with 2% KCl water and spotted 200 gal. of 75% HCl.
5. Frac'd. Pictured Cliffs zone with 29,000 gal of 70-30 quality foam and 27,000 lb. of 20-40 sand.
6. Blew well through 2" line overnight.
7. Pulled retrievable bridge plug at 3560 ft.
8. Ran 170 joints of 2 1/16" I.J., 3.25# tubing with 5 1/2" Baker-Lok-Set Packer. Bottom of tubing set at 5614 ft. R.K.B. Top of Packer set at 3567 ft. R.K.B. 62 joints of tubing (2038 ft.) was run as tail pipe below the packer. 1.43" I.D. "F" nipple was set at 5581 ft. R.K.B.
9. Ran 106 joints of 2 1/16" I.J., 3.25# tubing to the Pictured Cliffs. Landed at Subsurface Safety Valve: Manu. and Type Set @ 27,000 Ft. (over)

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations; and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed between and above plugs; amount, size, method of parting, of any casing, liner or tubing pulled and the depth, to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

3504 ft. R.K.B.

10. Blew and cleaned (pictured) Cliffs and swabbed Mesaverde. Mesaverde zone did not kick off. Shut into build up pressure.

11. Job completed 2/16/82.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state a pertinent detail including estimated date of starting any proposed work. If well is directionally drilled, include true vertical depths for all markers and zones pertinent to this work.)

1. The well was drilled to a depth of 3504 ft. and was completed in the Mesaverde zone. The well was then tested and produced at a rate of 100 bbls per day. The well was then plugged and abandoned.

2. The well was then tested and produced at a rate of 100 bbls per day. The well was then plugged and abandoned.

3. The well was then tested and produced at a rate of 100 bbls per day. The well was then plugged and abandoned.

4. The well was then tested and produced at a rate of 100 bbls per day. The well was then plugged and abandoned.

5. The well was then tested and produced at a rate of 100 bbls per day. The well was then plugged and abandoned.

6. The well was then tested and produced at a rate of 100 bbls per day. The well was then plugged and abandoned.
