Re: Downhole Commingled Production  
Caulkins Oil Company  
State A 268E  
Unit P Section 16 26N 6W  
Rio Arriba County, New Mexico

Dear Mr. Chavez:

Following are results of tests taken on Chacra and Mesa Verde zones before commingling well.

After all zones were fractured and cleaned up, 7" Packer and Retrievable Bridge Plug were run in hole with Bridge Plug set below Mesa Verde perforations and Packer set above Mesa Verde perforations. Well was then shut in for 48 hours.

Mesa Verde Shut In Pressure	1140#
Chacra Shut In Pressure	1020#

Opened Mesa Verde to atmosphere for 3 hours. Gas gauged 307 MCFPD with small show of oil.

Opened Chacra to atmosphere for 3 hours. Gas gauged 201 MCFPD with no show of oil.

From results of above tests we recommend following breakdown for future production:

Chacra zone	42% of all Gas
Mesa Verde zone	58% of all Gas and 100% of all Oil.

Yours very truly,

Charles Verquer, Superintendent  
Caulkins Oil Company
