Application to Commingle the Mesaverde and Dakota Gas Producing Zones
Sections 13 - 26, T26N-R4W,
Rio Arriba County, New Mexico.

Gentlemen:

It is proposed to downhole commingle the Mesaverde and Dakota gas zones in these sections in order to maintain economic operation and permit further economic development within the subject area. The development of resources in this area is not feasible without the reduced capital investment and operating costs realized by commingling wells.

Elimination of excess operating equipment and expense associated with dual operation will contribute to extending the producing lives and recoveries in marginal wells. In addition further development potential exists in these sections and is economically feasible if initial costs can be reduced by eliminating duplicate materials and facilities.

The following attachments are submitted in support of this application:

1. Exhibit A is a plat showing all Mesaverde and Dakota wells in these sections as well as the affected leases.
2. Exhibit B is a list of the most recent well tests from each Mesaverde and Dakota well in the subject area.
3. Exhibit C is a packet of current decline curves for each well.
4. Exhibit D is a list of shut-in tubing pressures for both zones taken during an extended field shut in.

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED DATE 2-5-2005 BY 6032 GOM/ELP/3
