Attention: Mr. Kenneth E. Roddy

Administrative Order NSL-1231

Gentlemen:

Reference is made to your application for approval of a non-standard location for your Jicarilla "G" Well No. 4-E to be located 1800 feet from the North line and 630 feet from the West line of Section 11, Township 26 North, Range 5 West, NMPM, Basin-Dakota Gas Pool, Rio Arriba County, New Mexico.

By authority granted me under the provisions of Rule 3 of Order No. R-1670, the above-described unorthodox location is hereby approved.

Sincerely,

JOE D. RAMEY,  
Director

Santa Fe, New Mexico 87501

Attention: Mr. Joe D. Ramey

Gentlemen:

We request administrative approval to drill our Jicarilla "G" No. 4-E well on a non-standard location. We originally had the well staked in a standard location, but failed to get archeological clearance because some artifacts were found. Because of archeological and topographical reasons, we were unable to stake a standard location.

The proposed well is 1800 feet from the North line and 630 feet from the West line of Section 11, Township 26 North, Range 5 West, Rio Arriba County, New Mexico.

We have attached copies of letters to offset operators stating our intentions.

Also attached are copies of Form No. C-107 and copies of the topographical map of the area.

This well will be a Basin Dakota completion.

Farmington, New Mexico 87401

Gentlemen:

Supron Energy Corporation proposes to drill the Jicarilla "G" No. 4-E, a Basin Dakota well, located 1800 feet from the North line and 630 feet from the West line of Section 11, Township 26 North, Range 5 West, N.M.P.M., Rio Arriba County, New Mexico.

This location was re-staked in an unorthodox spot after the original location failed to pass the Archeological inspection. We were unable to find a conventional location that would pass the inspection.

Our records indicate that you are the owner and operator of acreage which adjoins this drilling block. If you have no objections to this proposed well, we would appreciate your signing the attached two (2) copies of this letter and returning same to this office.

Your prompt consideration of this will be greatly appreciated.

Kenneth E. Roddy

LOCATION AND EQUIPMENT LAYOUT

Supron Energy Corp.  
Quinnella "G" No. 1-E

OIL CONSERVATION DIVISION

Proposed Well: SUPRON - JICARILLA G #4E

Land Status: Jicarilla Apache Tribe.

Location: The proposed location is in the Center  $\frac{1}{2}$  of the East  $\frac{1}{2}$  of the NW $\frac{1}{4}$  of the NW $\frac{1}{4}$  of Section 11, Township 26 North, Range 5 West, N.M.P.M., Rio Arriba County, New Mexico. The well will be 800 feet from the north line and 1120 feet from the west line of Section 26. (Figure 2)

U.T.M.: Center - 13; 2,91,070 mE; 40,42,460 mN.

Access: Existing - adjacent to Supron - Jicarilla G #4A.

Area Surveyed: 2.07 acres.

Terrain: Mesa with northerly drainage, alluvial surface deposits, and sandstone outcrops.

Soil: Sandy clayey loam.

Vegeation: Piñon, juniper, mountain mahogany, scrub oak, bitter-brush, serviceberry, narrowleaf yucca, broadleaf yucca, prickly pear, indian ricegrass.

Cultural Resources: Site SJC-588, a Gallina phase site, was found on the proposed well location. Due to topographic restrictions, it was not possible to avoid the site which is immediately east of an existing well location (Jicarilla G #4A) on a narrow bench on the north side of BS Mesa (also known as Honolulu Mesa).

Recommendations: Archaeological clearance is not recommended for the proposed well at this location. It was suggested that the proposed well be moved slightly west and be entirely contained on the large existing Jicarilla G #4A well location. The eastern edge of the existing well location is fifty to seventyfive feet west of the proposed well stake. It is therefore recommended that there be no new disturbance east of the existing Jicarilla G #4A well location.
