(Note: Report results of multiple completions on Well Completion or Recompletion Report and Logform.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well is MesaVerde-Mancos commingled, approved by NMOC on August 9, 1983, Administrative Order No. DHC-418. Apache Corporation took over the management of this well for MW Petroleum in September, 1991. The well was flow tested from July 1992 to August 1993, then shut in due to economics and pending evaluation by our Exploration Department.

At this time, MWP is awaiting testing results by Mallon Oil Co. on their offset re-completions in the Mesa Verde. As the horizontal drilling technology is refined, applications for it in this well become feasible.

MW Petroleum is requesting that this lease be held with Temporary Shut-In Status until both issues are evaluated for potential in this well.

14. I Certify that the foregoing is true and correct
