Re: Breech B #172E and Breech C #248, Commingling

Dear Charles,

The enclosed C-104's are not needed on the above mentioned wells. What we do need to show that the commingled was done is for form 9-331 to be filed with the Bureau of Land Management, stating the work performed and final tubing size and depth.

It would be helpful when the deliverability test has been completed and is submitted, that you show in the remarks section that it is a test after workover and commingling.

If you have any questions, please call.

Sincerely,

Luanne Hisel
