17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

The APD was approved for a dual Mesaverde Dakota completion for this well. It was approved to run 2 strings of 2-3/8" J55 tubing to each zone with a production packer set between the zones.

We now desire to commingle the Mesaverde and Dakota zones as approved by the New Mexico Oil Conservation Division of the Minerals Management Department in Santa Fe, New Mexico on May 21, 1984 in Case No. 8186 Order R-7540. We do not plan to change any of the drilling program. The completion will remain the same as applied for. We now desire to run one string of 2-3/8" J55 tubing to the Dakota zone without a production packer and produce both zones through one string of tubing. All other aspects of the approved APD will remain unchanged.
