(Note: Report results of multiple completions on Well Completion or Recompletion Report and LogForm.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Refer to: Jic Contract 118 3160 (010-amj)

Apache Corporation believes that Energen has recently completed their Jicarilla 117 #3A Unit E well in Section 34, T26N, R3W, just west of Apache's A118 #10 well in Section 35, T26N, R3W. It is Apache's understanding that the well was completed as a commingled Mesaverde-Dakota well and that Williams Field Services has installed a gas sales line to the well.

We respectfully request an extension for the plugging and abandonment of the Apache A118#10 until we can ascertain whether or not there exists recompletion potential based on production results from the Energen well. We anticipate that within one year, we should have sufficient production history to make a proper evaluation of the recompletion potential of the A118#10 and can move forward with a recompletion attempt or plug and abandon the well.
