13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.

Apache Corporation took over the management of this well for MW Petroleum in September 1991 and produced this well from March 1992 to Sept. 1994 and from June 1995 to January 1996 as gas and oil prices have risen enough to make this well economical to produce.

MW's Exploration Dept. is evaluating an offset operator, Mallon Oil Co., on their re-completions in the Mesa Verde formation, to see if it is feasible to also re-complete this well in the MV. Horizontal drilling is also being evaluated as the technology increases and the price decreases.

MW Petroleum is requesting that this lease be held with a Temporary Shut-In Status until both issues are evaluated for potential in this well.
