Dear Frank,

We have reviewed the gas and oil tests on our Jicarilla H #11E (K Section 18, T26N-R4W), Rio Arriba County, NM), which is a commingled Blanco Mesaverde-Undesignated Gallup-Basin Dakota well, as per N.M.O.C.D. Order #DHC-639. Based on tests taken during completion operations and the ultimate reserves of the nearby Gallup, Mesaverde and Dakota wells, we feel that the following oil and gas production allocation on the subject well's commingled zones would be reasonably accurate:

| | <u>Gas</u> | <u>Oil</u> |
|-----------|------------|------------|
| Mesaverde | 12% | 32% |
| Gallup | 56% | 35% |
| Dakota | 33% | 33% |

Please let us know if this percentage allocation meets with your approval.

Sincerely,

P. M. Hippen
Production Engineer
