(Other) Surface commingle <input checked="" type="checkbox"/>		(NOTE: Report results of multiple completion or Well Completion or Recompletion Report and Log form.)	

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Amoco Production Company requests approval to surface commingle the liquid production from the Bear Canyon Unit wells into a central tank battery. A survey of the proposed tank battery site and flowlines is attached. The flowlines will be 4" fiberglass with 4' of cover. Only wells in the Bear Canyon Unit will be tied into the battery, with a potential of 16 wells in the unit. The working and royalty interest ownership is common for all wells. The oil sales will be through a LACT unit. Monthly GOR tests will be used to allocate production to the individual wells.
