proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and cones well.
sent to this work.)

The APD was filed and approved for this well as a South Blanco Pictured Cliffs.
It is now intended to complete and test this well in the Fruitland Coal Zone.

We Propose to test Coal Zones 2700' to 2870', testing individual Zones separately
to evaluate possible commercial production.

Each zone will be tested natural then stimulated and tested.

No new surface to be disturbed.

From Log Analysis we do not anticipate large amounts of water production.

During testing all produced water will be confined in reserve pit after being
measured in test tanks.

18. I hereby certify that the foregoing is true and correct
